About Company

Enviromin Projects was founded in 2017 by owner Candis Lubbe with 19 years individual environmental consulting experience in the mining, construction and general industry sectors.

By nature Candis Lubbe is a generalist solopreneur who thrives on a holistic approach to tackling any social or environmental challenge. She shares a broad interest in the mining and waste sectors who naturally considers responsible ways to moderate the risks encountered by your economic enterprise.

“Take the long hard road, its quicker” is a motto that she has come to learn and abide by. Without taking any shortcuts, our core value is taking a minimalistic approach to provide a direct compliance solution, ensuring that the process is as stream-lined as possible to suit your compliance requirements.

Vision & Mission

Vision

Enviromin Projects vision for a new earth is to harness the abundance of environmental resources by working with developers and technology that focus on waste management innovations, utilising renewable energy resources and align with responsible use of natural resources.

Mission

Enviromin Projects proudly aligns with the 2030 Sustainable Development goals by always putting people first, harnessing abundance and managing environmental resources in peaceful collaboration with all stakeholders.

The mission is to apply a parsimonius approach (simplest, direct route) in guiding project developers through mandatory environmental legal processes.

"I hold a vision of this blue green planet, safe and in balance. At the end of the Fossil Fuel Era, we are emerging to a new reality. We are ready to make the next leap – as momentous as abolishing slavery or giving women the vote."

– Elizabeth May

Services
